

Real Time. All The Time.

Cash Free School

xiTix™ Cash Free School solution is another strong initiative from **xiTix** who believes in securing the students against any potential danger, risks or even abusive use of monies for that matter.

A simple plastic card and it works for all! You always thought it was risky for kids to carry hard cash to school as they might lose it or either use their monies in an abusive way. But for this you just couldn't stop kids

carrying cash to school, since as carrying cash should be avoided, having no cash with kids also makes them helpless anywhere they go.

Cash Free School solution help schools to refrain from any such unauthorized activities inside the school campus. Be it school food canteen, paying school term fees, buying books or even paying late fee in the school library for not returning the book on time. Any monetary transaction within the school premises can be done with the use of this simple, slim plastic card.

This is not all; kids do not need to carry their existing ID-cards (if any) since this works also as an ID cum Cash card. So practically they only tend to carry one single card that works for all!

HOW IT WORKS

Cash Free School solution requires the Card Reader device installed at all locations where the card transaction has to occur. XITAG the smart ID cum Cash card from **xiTix** is designed to act as a smart card as well as will have the ability to store credit. This credit can be used as debit cards at the school canteen to make purchases. Every time the students use their XITAG card for buying things at different POS counters within the campus limits, a transaction takes place where the monies are debited from their personal account. The card just works as a normal bank debit card available around the world but is based on a different technology. Consider a student going to the school food canteen and buys lunch for himself or for that matter for any friend. He offers the card to the attendant at the POS counter. The attendant TAPS the XITAG card on the Reader device which checks for the student's authenticity and displays the total available credit in that card on the display screen. The screen displays the total available limit as say \$60 in the student's account, the lunch costs \$3 which is debited from that account to show a balance of \$57. The student gets a paid receipt or a coupon with order details to collect his/ her order.

At given anytime the student is allowed to re-load his/ her account if they wish to do so. The School cashier will be provided with a facility to receive the cash from the students and to load the same on the student ID-card. For its popularity the school is advised not to accept cash at any of its departments and help make the school a cash free zone.

The **xiTix™** software platform enables seamless transactions across the school campus with secure data transmission over the LAN to any centralized data server.

Cash Free School is equipped with advanced technology using RFID, and packaged in a WP IP 65 enclosure for rough on site usage. It makes the unit rugged, drop and shock resistant. The card is designed considering student environment and is low on maintenance cost with long life of 5 years.

FEATURES & BENEFITS

xiTix™ Cash Free School is a combination of its powerful software and smart hardware which offers following features and benefits:

FEATURES	BENEFITS
Stores Credit	No handling of hard cash, stop abusive use of monies
Long life of 5 years	Low maintenance cost
Secure and Seamless Transactions	Campus wide use, Cash free environment
Single Card Interface (Smart ID cum Cash Card)	Super light & slim design, Easy to use and carry
Use in ReTSER, ReTSIS or Cash Free School Solution	ALL-FOR-ONE Solution, Maximum benefits!
Connectivity over LAN to the Data Server	Secure data, No human intervention

“ALL-FOR-ONE” SOLUTION

What if along with the benefits of Cash Free School solution the school could use the same smart card to record an automatic student attendance while they Enter/ Exit school campus or when they Get On/ Off the school bus? **xiTix™ ReAL TIME STUDENT EXCEPTION REPORTING (ReTSER)** solution can do it all! It could even generate REAL TIME alerts as a text message or email to parents or people concerned about the kid’s non-routine movements/ exceptions.

If you wish more – it can also work as “Personal Keypad” and help school go paperless! Students answer their tests with their Personal Keypad and grades are calculated by the time they answer their last question, with no manual intervention. This is possible by implementing the **xiTix™ ReAL TIME STUDENT INTERACTIVE SYSTEM (ReTSIS)** solution which can change the entire school outlook and make it as the place to be!

xiTix™ Cash Free School is a smart way to make the school a cash free environment. Learn more about **Cash Free School** solution.
