

**Real Time. All The Time.**

## **ReAL TIME School Bus Camera (ReTCam)**

**xiTix™ ReTCam** solution guarantees On-Bus security through visual monitoring of students while they are transported from their homes to school and when they're dropped back home or even when being transported for a community session; let anything be the reason, **ReTCam** gives student transport security at its best!

**ReTCam** encompasses of various security functions and optional features to be selected depending on the requirement and spend appetite.

### HOW IT WORKS

**ReTCam** enables student visibility across transportation. This multi-feature solution consists of:

**ReTCam Visual Security** system is designed for a complete security mechanism that allows responsible authorities to have a bird's-eye view to capture the movements inside the school bus with a real time visibility option. Whatever maybe the requirement, select feature that fits your budget.

- ❖ Snap Shots – The system captures live pictures to be viewed at later stage for uncertainties being occurred, in a cost efficient way but to give away with the real time control.

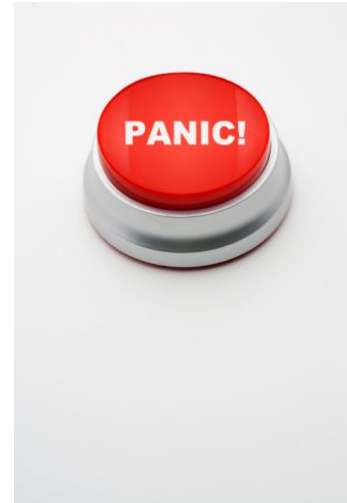

- ❖ Video Recording – Record activities inside the school bus and store these videos on a diskette that allows viewing at later stage. Archived diskettes can be further used for reference. Again, this proves to be a cost effective solution but to give away with the real

time control.

- ❖ Live Video – The live video/ streaming option is the best of visual security that is high on real time visibility. It allows responsible authorities to take appropriate actions and handling incidents live inside the school bus in most pro-active manner.

**ReTCam Child Detection** system ensures that no child is left behind in the bus at the end of the trip. If the child boards the bus but has not got off till the last bus stop, the driver gets an alert on immediate basis.

**ReTCam Child Security** system is a way of monitoring the bus activity, allowing managers/ supervisors to take appropriate counter actions. Get alerted on real time basis if the driver exceeds speed limit, bus goes through rough bumps or dangerous jerks, etc. In case of emergency, driver can send you alerts with the help of panic button or even immobilize the bus remotely by just sending a text message to pre-defined number.

**ReTCam Driver Display** equips the driver with a screen which can display information of the students registered at each pick-up point while boarding the bus. The student's attendance is marked and displayed on the driver's screen as soon as the student boards the bus.

## FEATURES & BENEFITS

**xiTix™ ReTCam** is a combination of its powerful software and advanced hardware which offers following features and benefits:

FEATURES	BENEFITS
