

Real Time. All The Time.

ReAL TIME Teen Tracking System (ReTTeen)

xiTix™ ReTTeen is a dedicated Teen Tracking System that allows teen vehicles to be tracked with a GPS device installed in them.

ReTTeen can help parents track the speed of the vehicle, distance driven, driving patterns and even keep a location check. This web based system keeps parents informed about the teen whereabouts REAL

TIME. ALL THE TIME. It is the fear in every parent with their young kid's driving habits, which makes **ReTTeen** a "must" considering teen safety issues. Know where they are? What speed they are driving? Are they at the right place at the right time? Higher rate of teenage accidents and deaths makes **ReTTeen** a relatively low-cost tool for parents and teenagers to mitigate the risks of teen crashes and in the process save money, worries and lives.

The system acts wireless and transmits data using GSM/GPRS network.

HOW IT WORKS

ReTTeen once implemented for teen vehicles, takes charge to monitor them. **ReTTeen** solution is a combination of a GPS hardware unit and the invaluable service provided by **xiTix** web based platform. A GPS unit has to be fixed inside the vehicle at an appropriate position. The unit does not need any external power supply but is capable of using the vehicle battery. Once this is done a dedicated online user access (ID and Password) is assigned to the teen's parent/ guardian or any registered person. Considering teen privacy issues, only authorized person is recommended to access this private user access. Assuming it is the teen's parent who logs in this private user account to view all the details of

teen's vehicle. **ReTTeen** allows parents to locate teen vehicles, monitor vehicle speeds, track mileage, and keep a check on their whereabouts. It also allows parents to set speed limits, set geographic boundaries that would report any unauthorized movements as alerts through text messages or email. **xiTix** web based software displays trips and stops made by the teen's vehicle, distance travelled and its mileage, vehicle idling and exceptions recorded. This is not all; in case of any untoward instances or

emergency the teen also has a panic button installed inside his/ her vehicle to send alerts to their parents directly while sitting on the driver's seat. For parents, there is also a functionality which allows them to disable vehicle functioning remotely.

Although we understand recording of teen actions does not completely restrain them from reckless driving or avoiding truancy, but definitely makes them cautious on their driving patterns and behaviors. **ReTTeen** directly help parents to improve teen driving practices and can also act as a way for insurance companies willing to appeal parents and teenagers. It surely makes sense having lower insurance premiums for all those having implemented the GPS based tracking system and playing safe!

ReTTeen should be perceived as a training ground – teaching teens about responsible driving even when they are beyond their parents' control and does not have to be an expression of a parent's lack of trust on the child's driving abilities. **ReTTeen** provides the teen, certain level of privacy and freedom and at the same time enable parents to oversee to his/ her safety even when they're not in the vehicle with them.

FEATURES & BENEFITS

xiTix™ ReTTeen is a combination of its powerful software and advanced hardware which offers following features and benefits:

FEATURES	BENEFITS
Live Tracking and Speed Monitoring	REAL TIME Visibility and Monitoring
Location Marking and Vehicle Movement History	Keeps you Informed
Immobilizer and Emergency Button	Total control in case of Emergency
Alerts and Reports	Dedicated Reporting and Personalization
xiTix Web based Software Platform	REAL TIME data anywhere in the world over Internet
Wireless connectivity to the Data Server	Secure Data and Transmission

xiTix™ ReTTeen solution helps mitigate tragic consequences of risky driving, teen crashes, truancy avoidance, save money, worries and in the process improve teen driving practices. Learn more about **ReTTeen** Do-It-Yourself solution.
